office about 15 minutes before the beginning of his shift. The autopsy report concludes that: "I died as a result of coronary artery atherosclerosis. It probably resulted in arrhythmia resulting in pulmonary congestion and mild hepatic and spleenic congestion." The death certificate indicates that the manner of death was natural. Based on the Autopsy Report and the results of MSHA's investigation, the committee members concluded that died from natural causes and his death should not be charged to the mining industry.
